PROFESSIONAL SUMMARY

Computer Network and Telecommunication Engineering (TJKT) student with national LKS competition experience (1st Place Bengkulu Province) and hands-on experience in full-stack web development, backend logic design, and web security. Proven ability to identify critical vulnerabilities (P1/P2 RCE) in enterprise infrastructure. Seeking roles in full-stack web development, backend engineering, and applied AI.

EDUCATION

SMKN 1 Kota Bengkulu — Computer Network & Telecommunication Engineering (TJKT)

2024 – 2027

Class XI TJKT 1 · Expected graduation 2027

- **Relevant coursework:** Cisco routing & switching, Linux administration, server infrastructure, cybersecurity, web development.

PROJECTS & EXPERIENCE

Independent Security Researcher (Bug Bounty)

2026

NASA Vulnerability Disclosure Program (Bugcrowd)

- Discovered and reported high-impact vulnerabilities (P1 & P2) in NASA web infrastructure, demonstrating deep understanding of backend security and web application logic.
- Identified a **P1 Unauthenticated OS Command Injection (RCE)** in the NASA International Mass Loading Service CGI (Status: Unresolved).
- Discovered a **P2 Unauthenticated Remote Code Execution (RCE)** via Insecure Deserialization in NASA PaaS Sandbox (Status: Unresolved).

JERNIH. — AI Civic Web Platform (LKS 2026 Competition)

2026

Data Scientist & AI Developer · JERNIH Team (5 members), SMKN 1 Kota Bengkulu

- Engineered a multimodal AI civic web application with a 4-Tier Graceful Fallback System (Groq Llama 3.1 70B → Gemini 1.5 Flash → OpenRouter → offline rule-based), achieving zero-downtime operation across global API clusters.
- Built 8 integrated web modules: RAG-powered Civic Copilot, Hoax Checker, Action Plan Generator, Policy Simulator, Knowledge Graph, OCR Smart Scanner, 3D Predictive Maps (PyDeck), and Architecture Viewer.
- **Result:** 1st Place Bengkulu Province & Participant at National LKS Dikmen 2026 Artificial Intelligence Exhibition.
- **Stack:** Python, Streamlit, LangChain, ChromaDB, PyDeck, NetworkX, Pandas.

Class 12 TJKT 1 Web Application Platform

2026

Frontend & Backend Developer · SMKN 1 Kota Bengkulu

- Designed and developed user-friendly UI layouts and responsive frontend components for the Class 12 TJKT 1 web portal.
- Engineered core backend logic, API endpoints, and data processing workflows to handle lab project interactions and class services seamlessly.
- Deployed and integrated the full-stack web application onto local class Linux server infrastructure.

HONORS & AWARDS

- **1st Place** — LKS Dikmen 2026 Artificial Intelligence Exhibition, Bengkulu Province (Kemendikdasmen Puspresnas).
- **National Participant** — LKS Dikmen 2026 AI Exhibition, Indonesia (Kemendikdasmen Puspresnas).

CERTIFICATIONS

- **Certificate of Participation** — LKS Dikmen 2026 Artificial Intelligence Exhibition, National Level (Kemendikdasmen Puspresnas).

SKILLS

Programming & Web:	Python, HTML5, CSS3, JavaScript (ES6+), Streamlit, Bootstrap 5, REST API, Git/GitHub
Cybersecurity:	Bug Bounty, Penetration Testing, Vulnerability Assessment, RCE Identification
AI & Data:	LangChain & RAG pipelines, LLM orchestration (Groq, Gemini, OpenRouter), ChromaDB
Operating Systems:	Windows 10/11, Linux (Kali, Debian, Ubuntu)
Networking:	Cisco routing & switching, VLAN, OSPF, DHCP, ACL, IPv4/IPv6 subnetting
Systems & Security:	Bash scripting, Server deployment, Local DNS & web hosting

LANGUAGES

Indonesian (Native) · English (Intermediate)
